# MS130K

### The Most Productive High Speed Camera In It's Class 1920 x 1080 at 2000fps

MS130K model shown with 32 GB camera body and on-camera monitor.

Mega Speed high speed cameras continue to offer the world's high speed imaging customers with some of the most productive high speed camera designs available. A camera design providing the customer with the very best features and prices available.

Mega Speed cameras are suitable for a wide range of applications. These high-speed cameras are suitable on the test range, in the R&D test lab or for use in that critical application where a dependable camera is needed to capture that all important test video. Optional automatic high speed file back-up to it's on-board removable solid state dive. Permanently saving the recent test video.

Mega Speed high speed cameras have several optional features such as high write speed removable solid state drives which are accessible through the camera's rear media bay. The removable drives offer data security as well as easy drive removal when replacements are required.

Standard onboard multi channel data acquisition module is ready to synchronize test data with your high speed image data offering a clear understanding and interpretation of the test video.

Contact us today to arrange a demonstration of our outstanding high speed camera models.
